Heirloom

Cloud Seminar Assignment · Screenshots of the cloud resources · Celia Banegas

Frontend	https://stheirloomb1n74.z43.web.core.windows.net (Azure Blob Storage static website)
API	https://heirloom-api.wonderfulriver-1cf9f55e.spaincentral.azurecontainerapps.io (Azure Container Apps)
Database	Azure Database for PostgreSQL flexible server
Repository	https://github.com/celiabanegas/heirloom-seminar1EMSE
Extras	Terraform for the database and the static website · CI/CD with GitHub Actions
Region	Spain Central · subscription Azure for Students

FIGURE 1 · AZURE RESOURCES

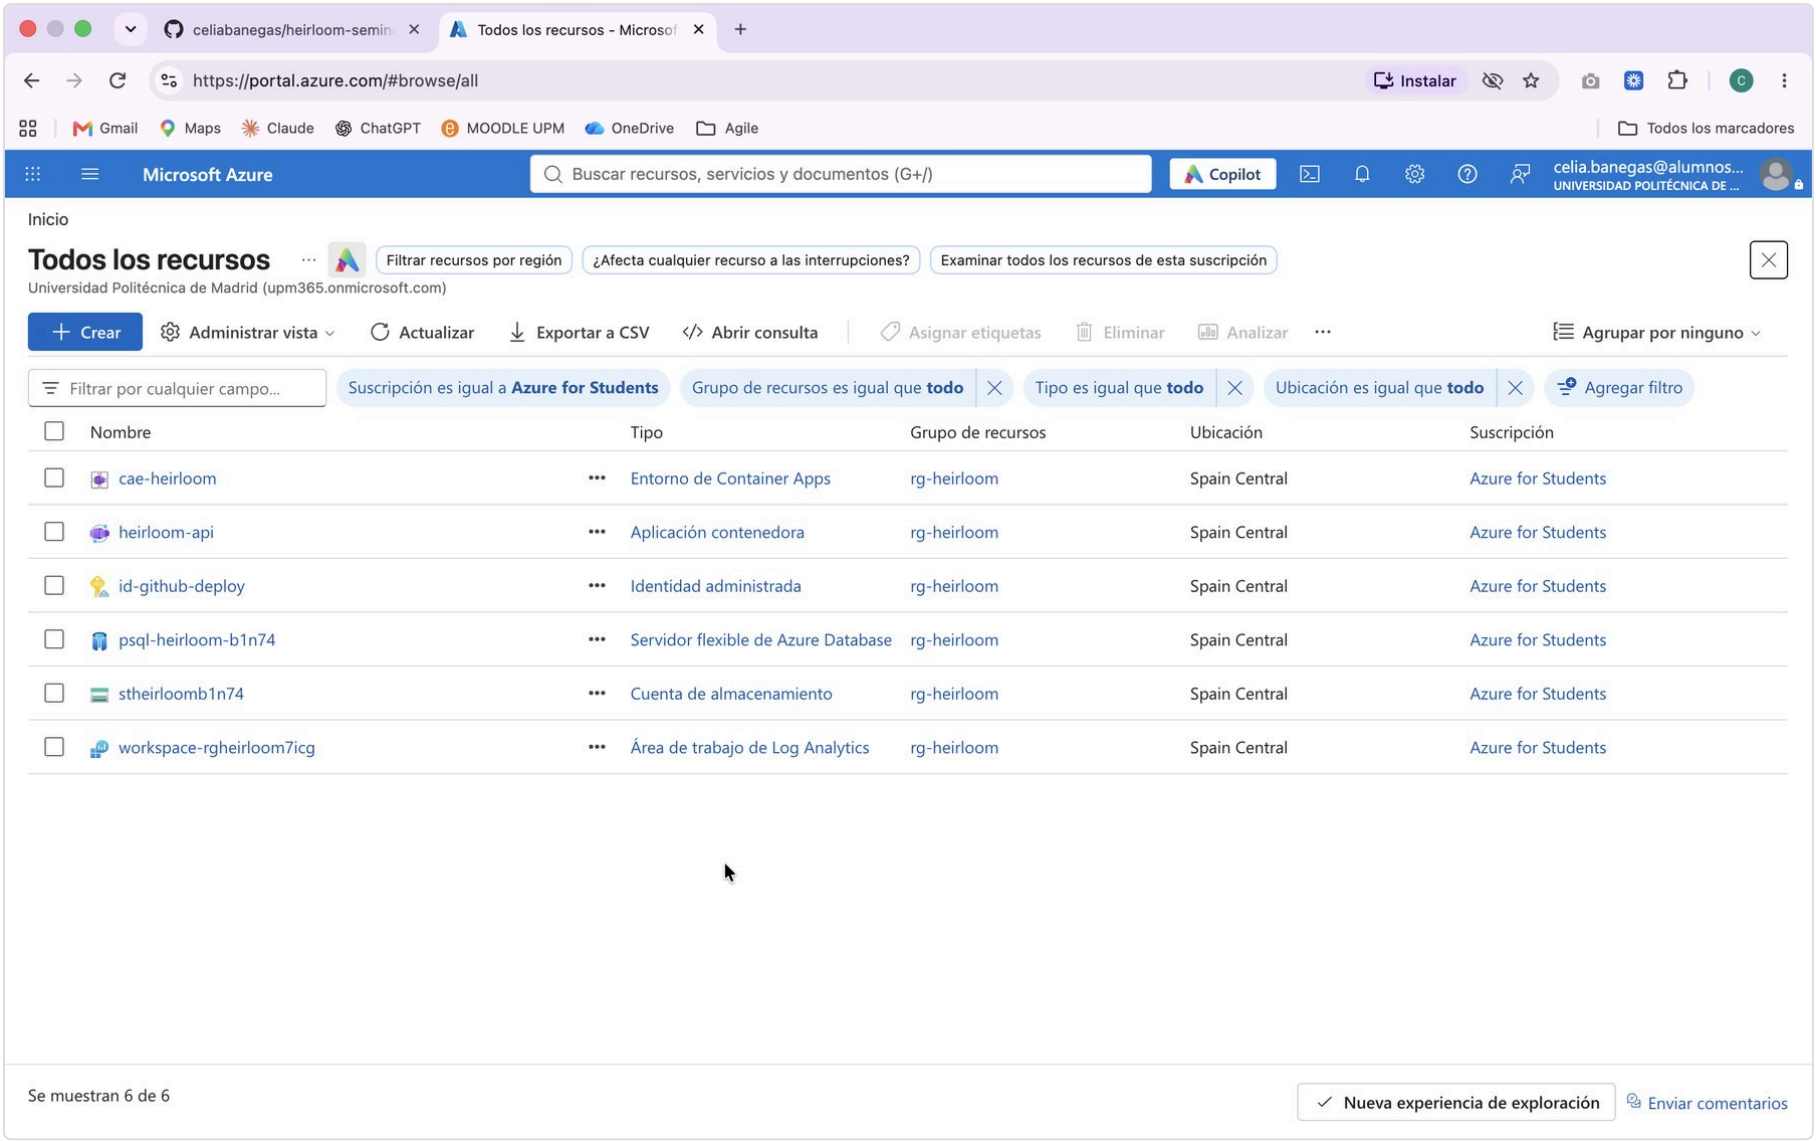

Figure 1. All the app's resources in the resource group rg-heirloom (Spain Central).

FIGURE 2 · TERRAFORM

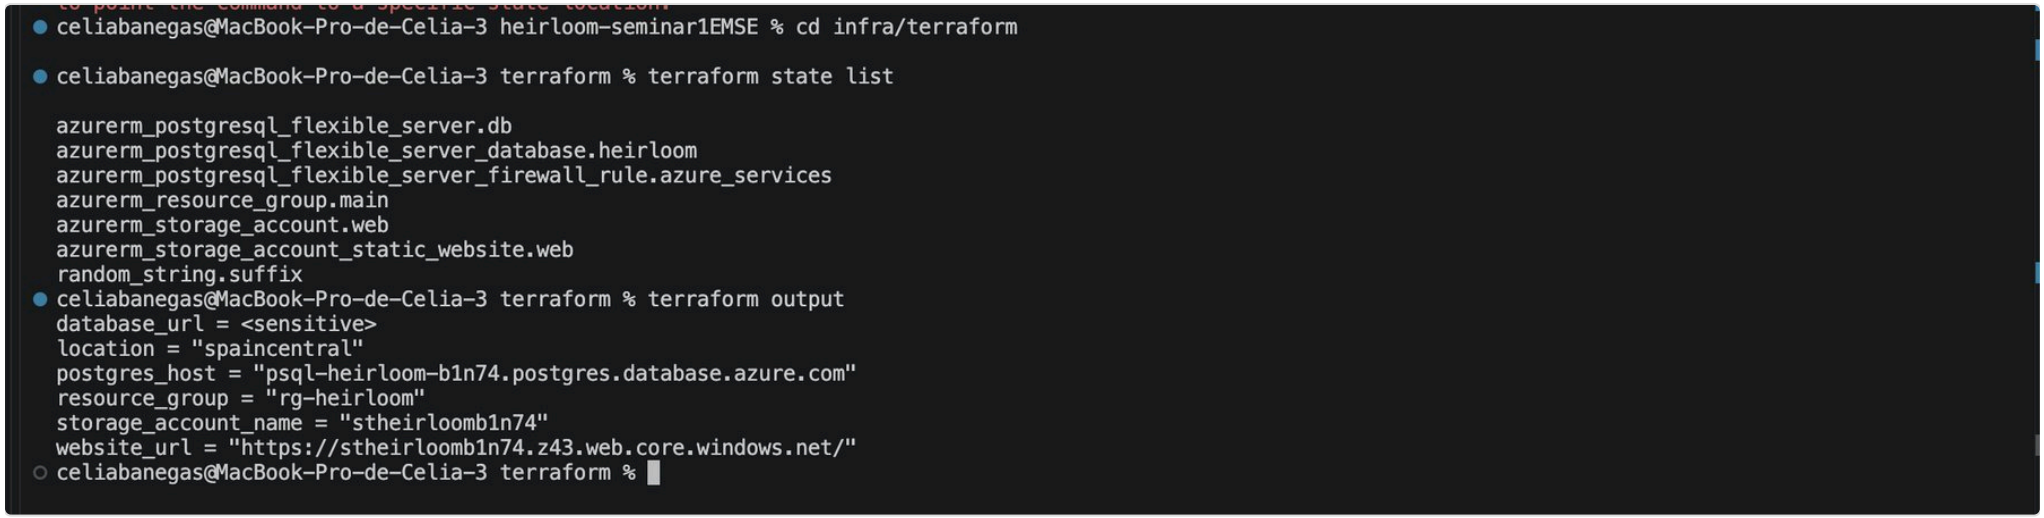

Figure 2. Resources and outputs managed by Terraform.

FIGURE 3 · POSTGRESQL

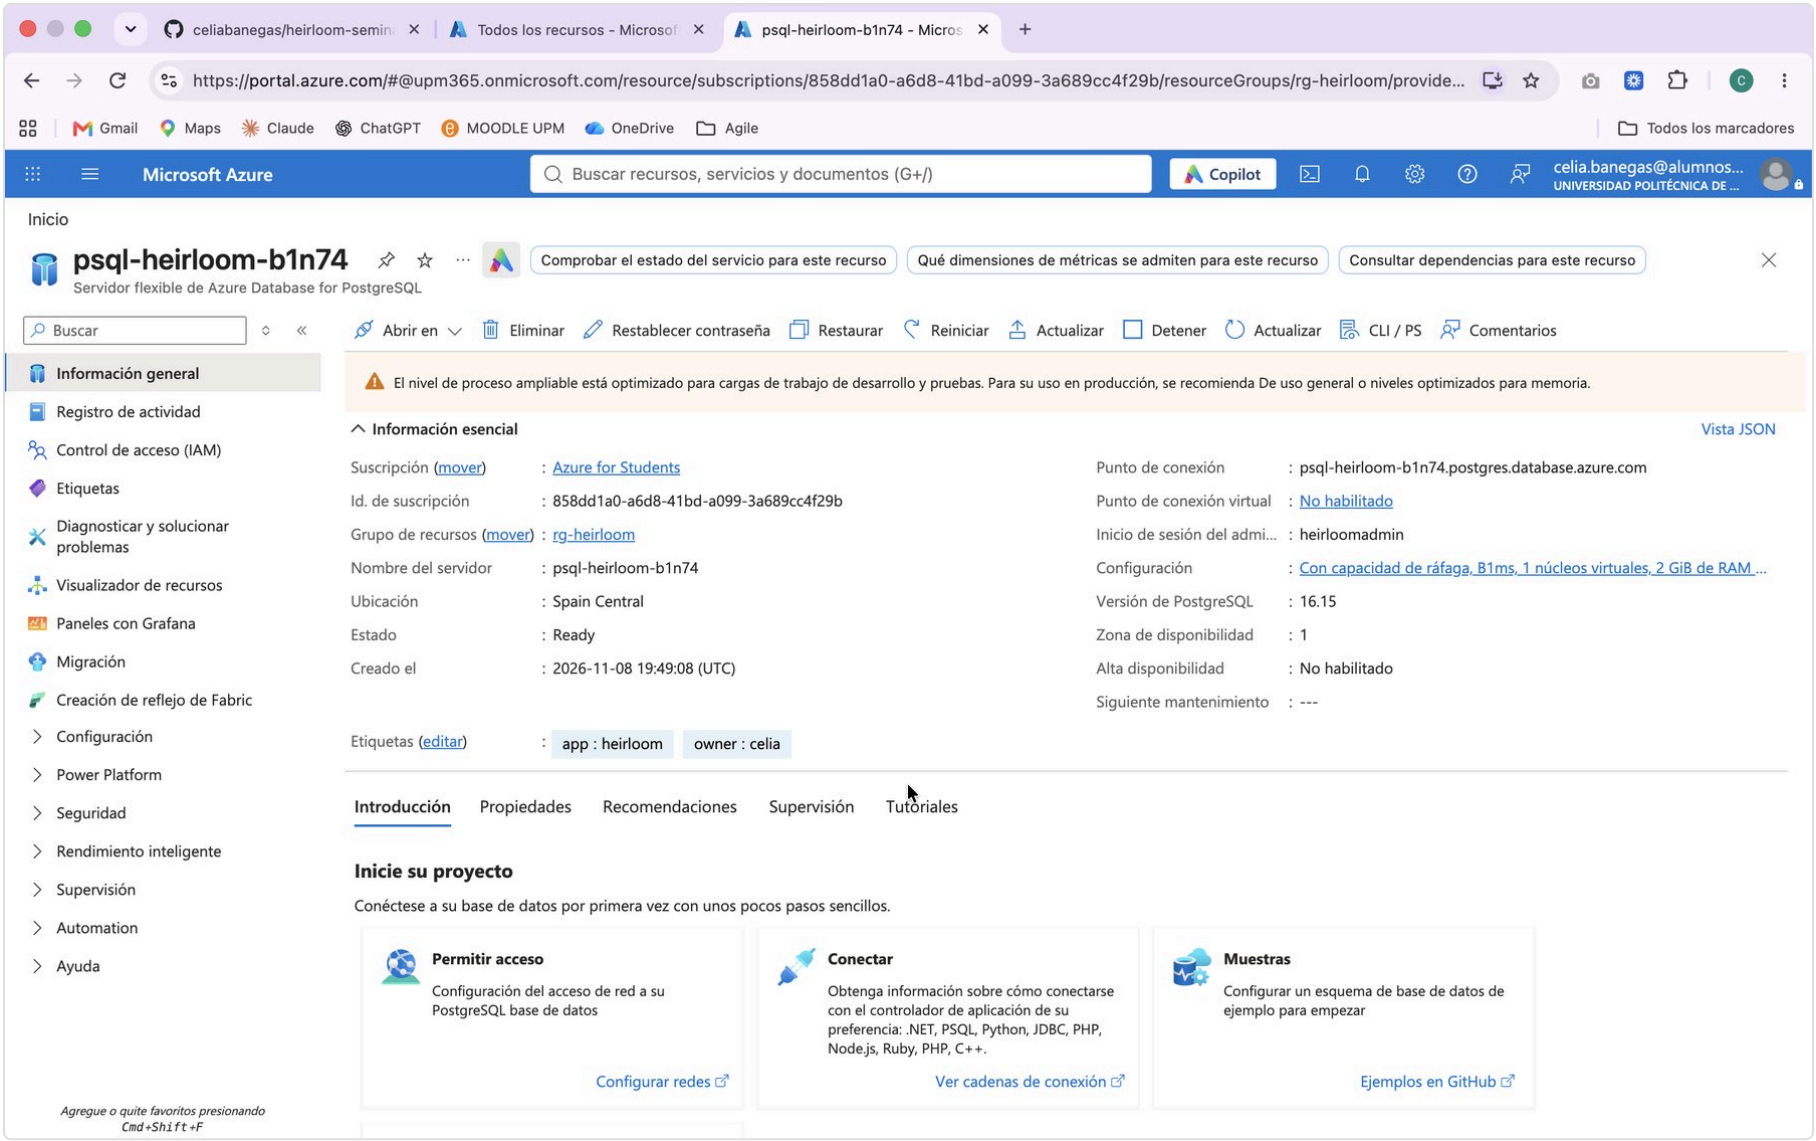

Figure 3. The PostgreSQL flexible server, up and running.

FIGURE 4 · POSTGRESQL NETWORKING

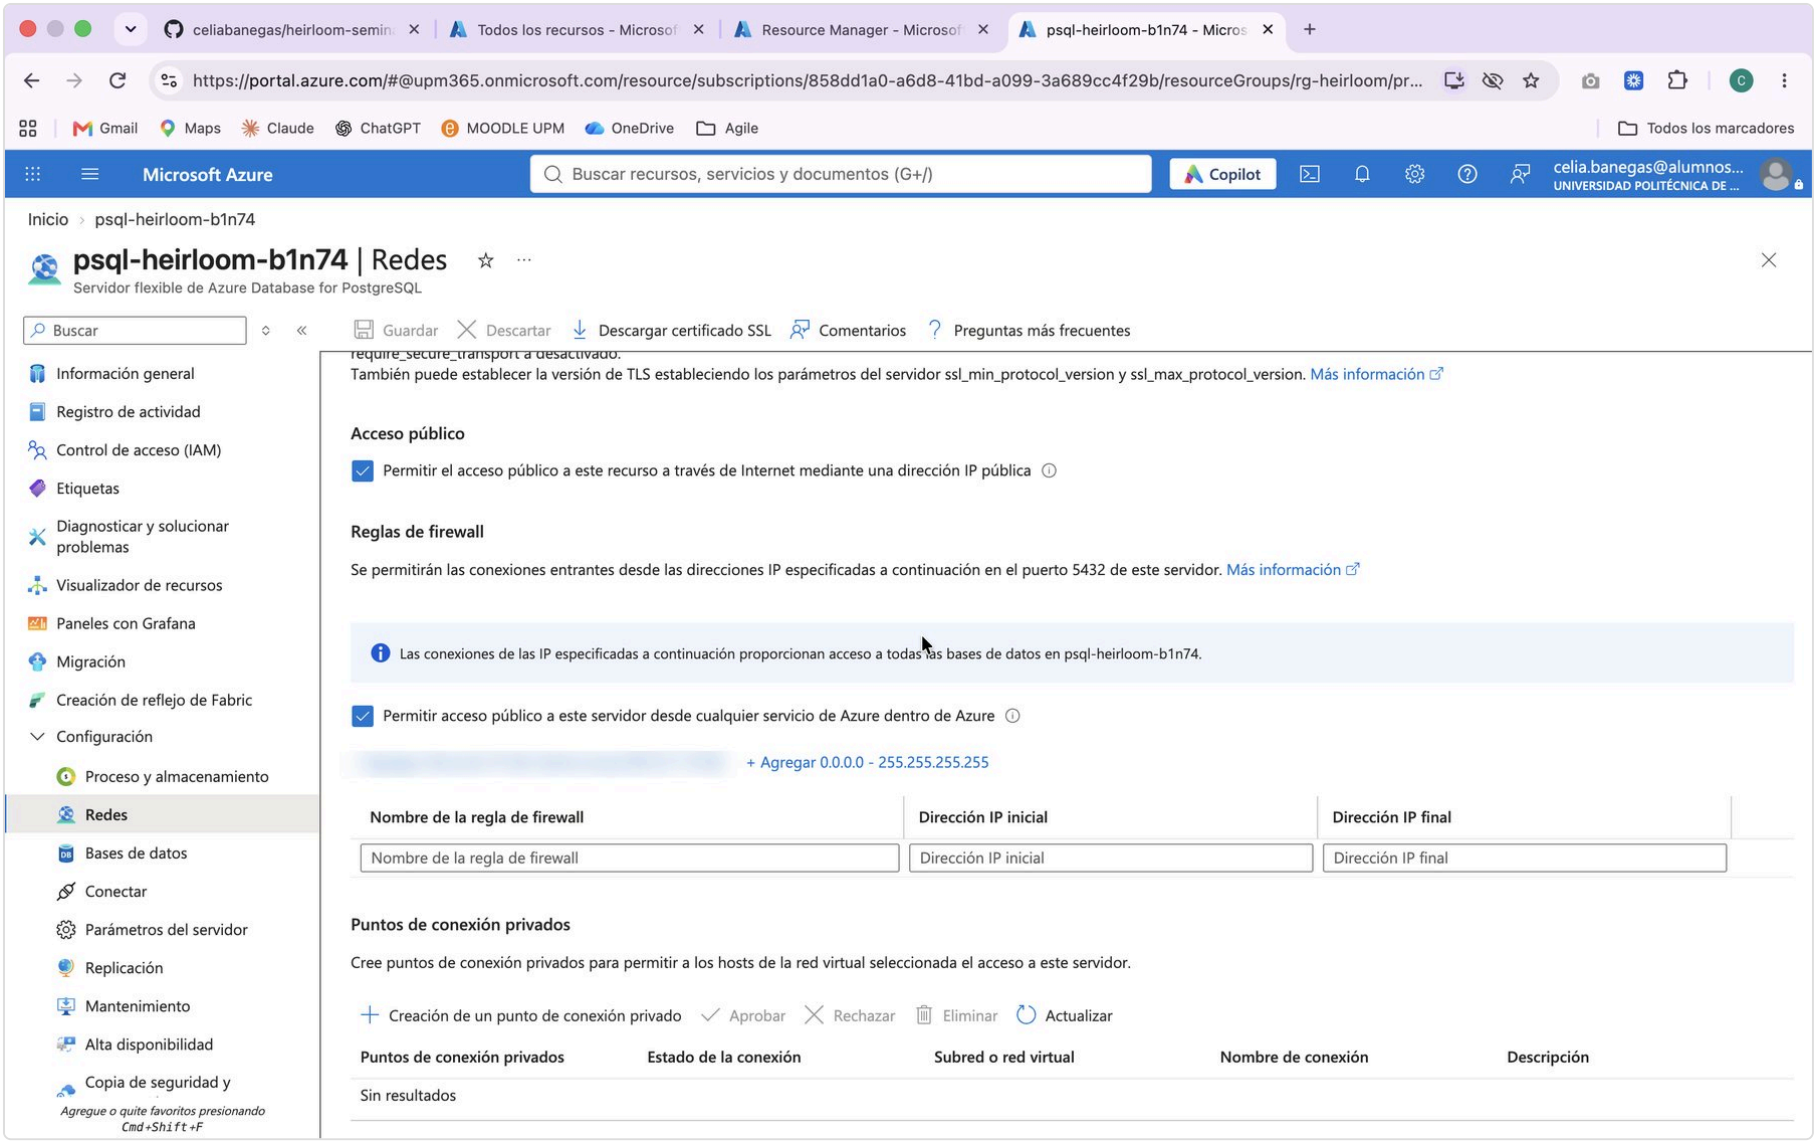

Figure 4. Only Azure services can reach the database.

FIGURE 5 · STATIC WEBSITE

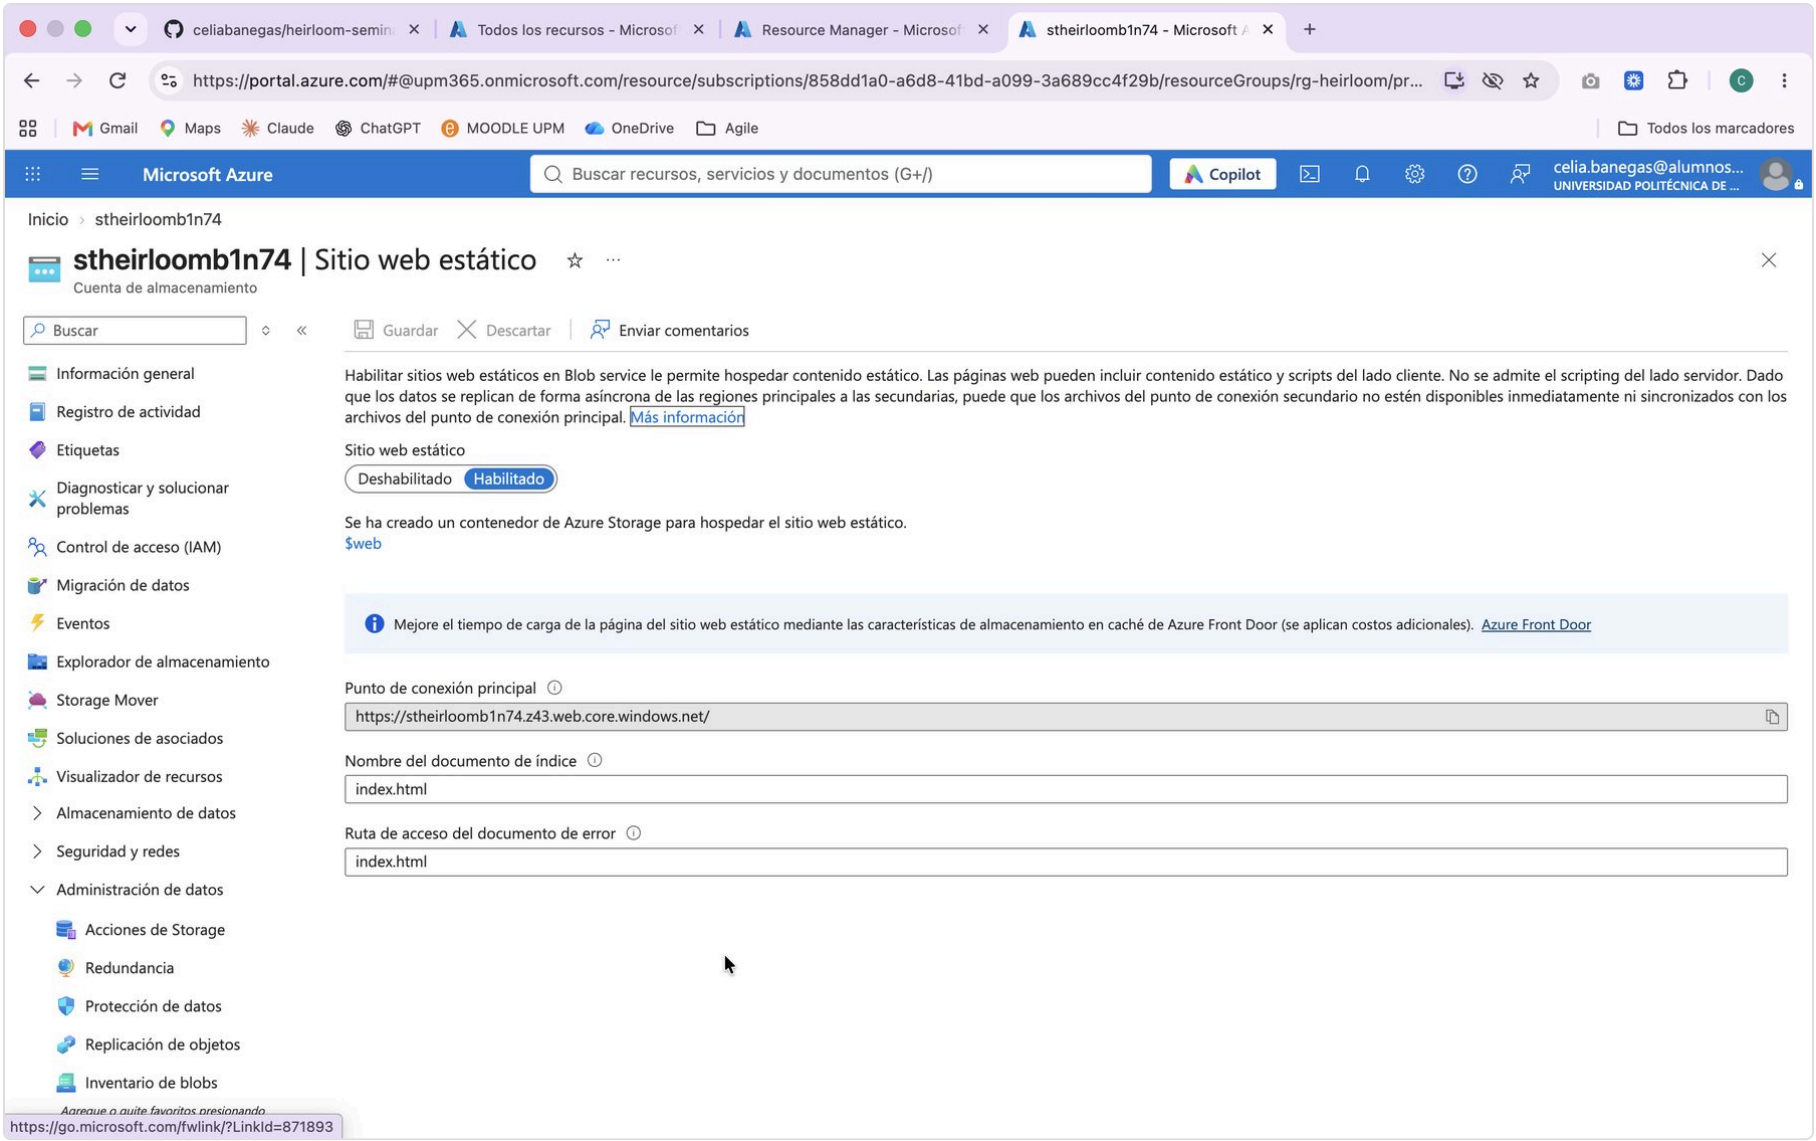

Figure 5. The storage account hosting the frontend.

FIGURE 6 · CONTAINER APP

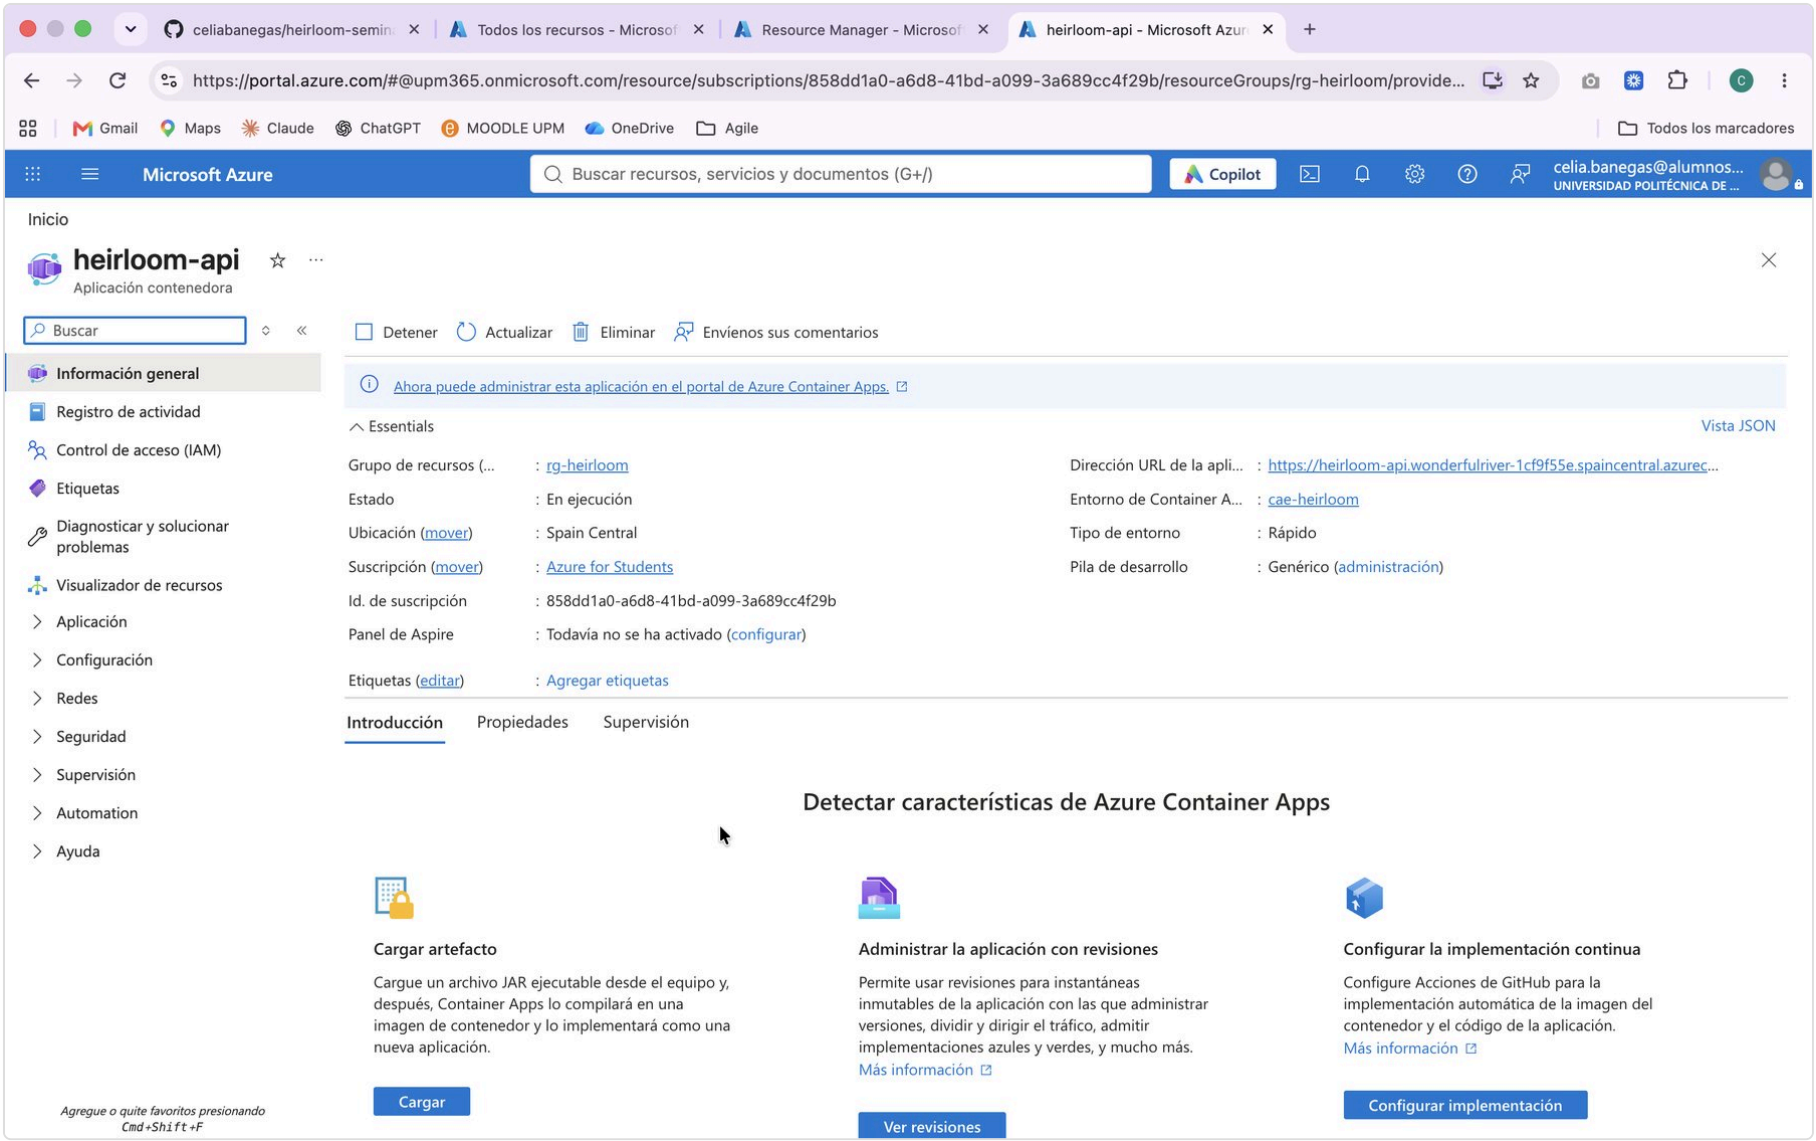

Figure 6. The API running in Azure Container Apps.

FIGURE 7 · SECRETS

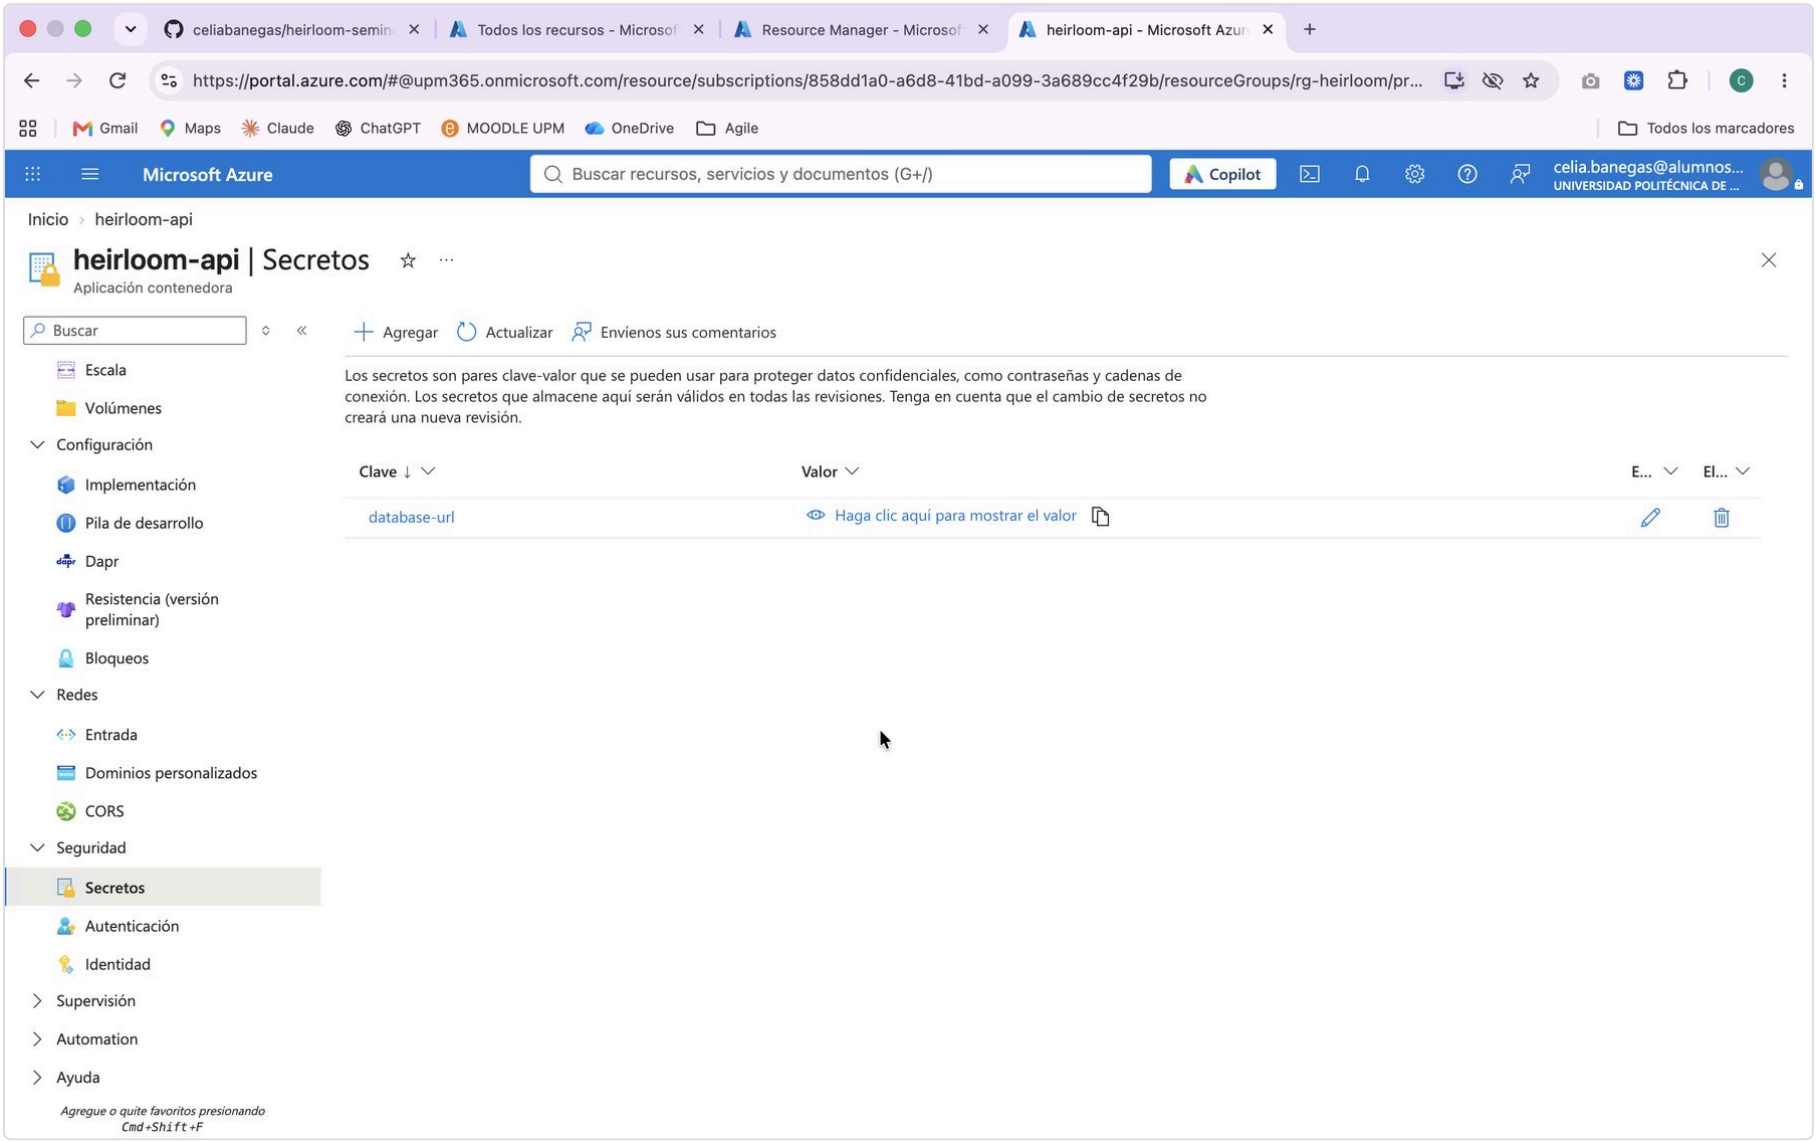

Figure 7. The database connection string, stored as a secret.

FIGURE 8 · GITHUB SECRET

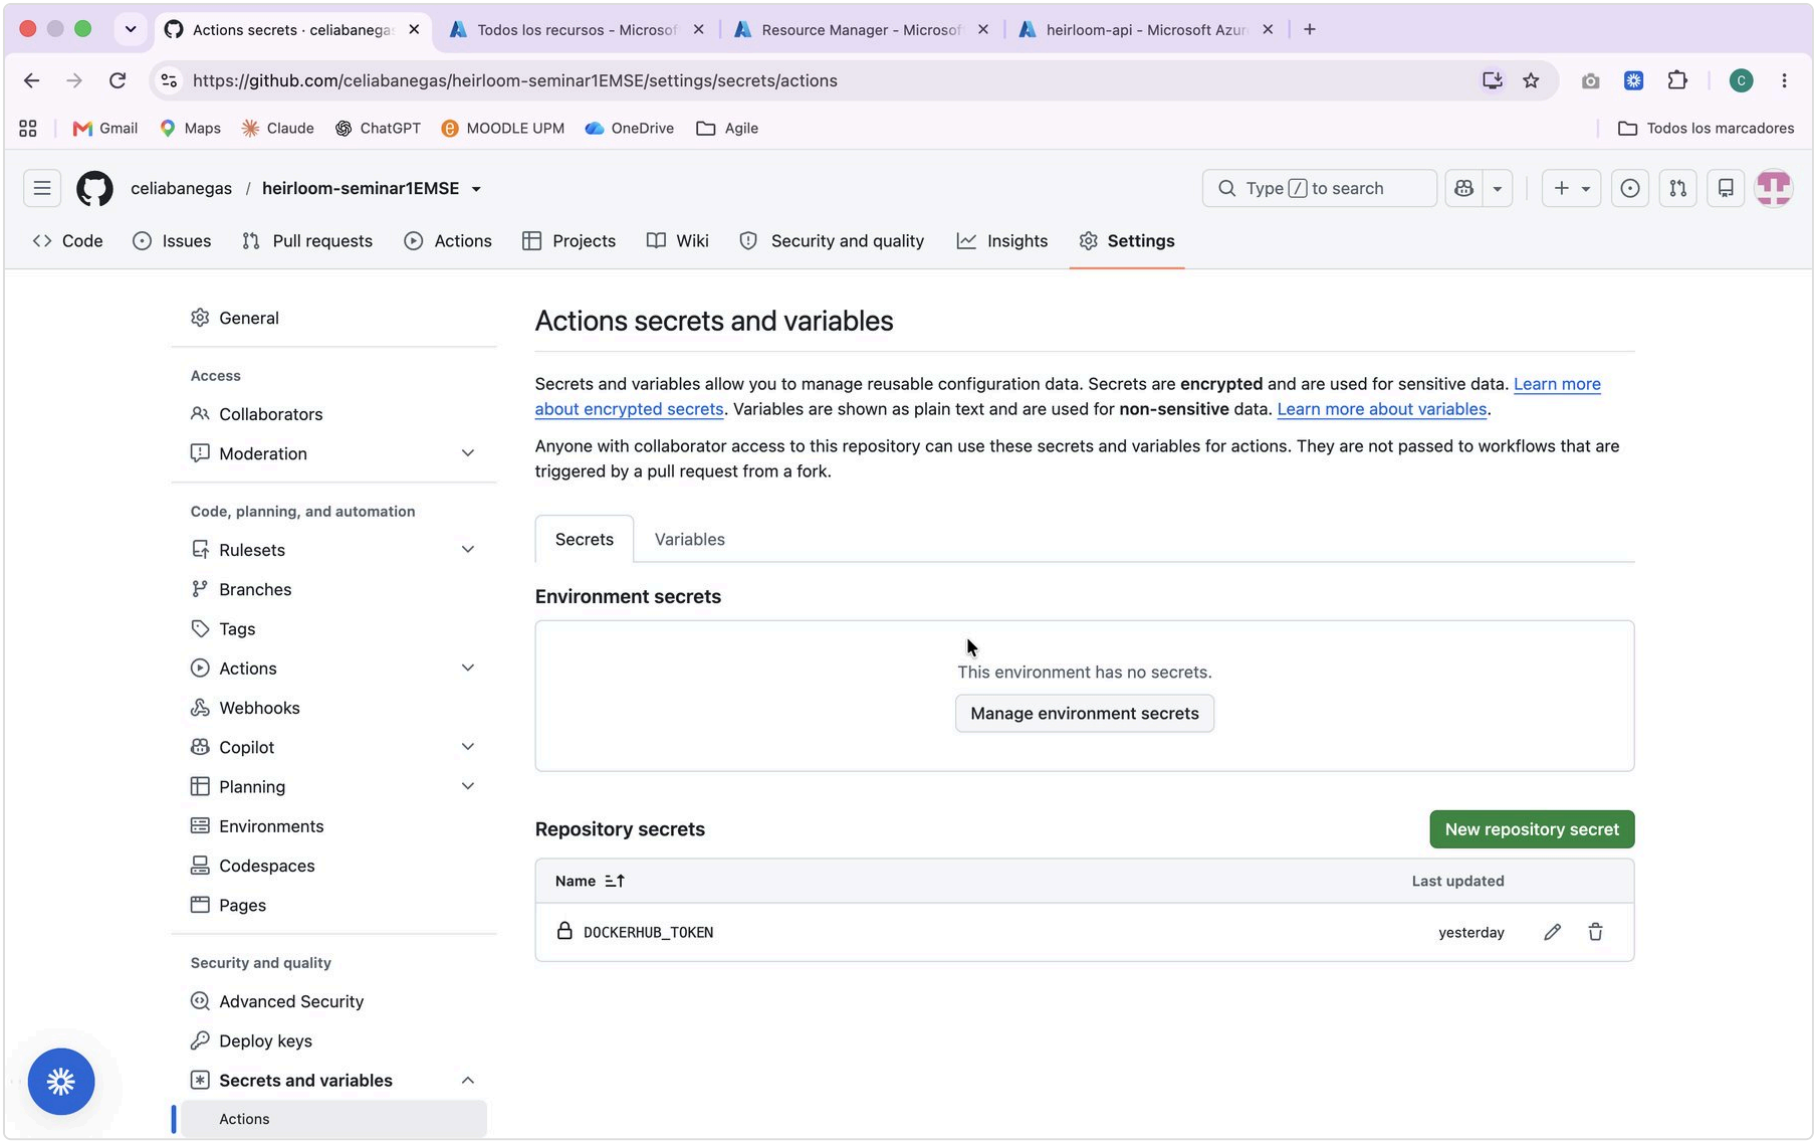

Figure 8. Docker Hub token used by the pipeline.

FIGURE 9 · GITHUB VARIABLES

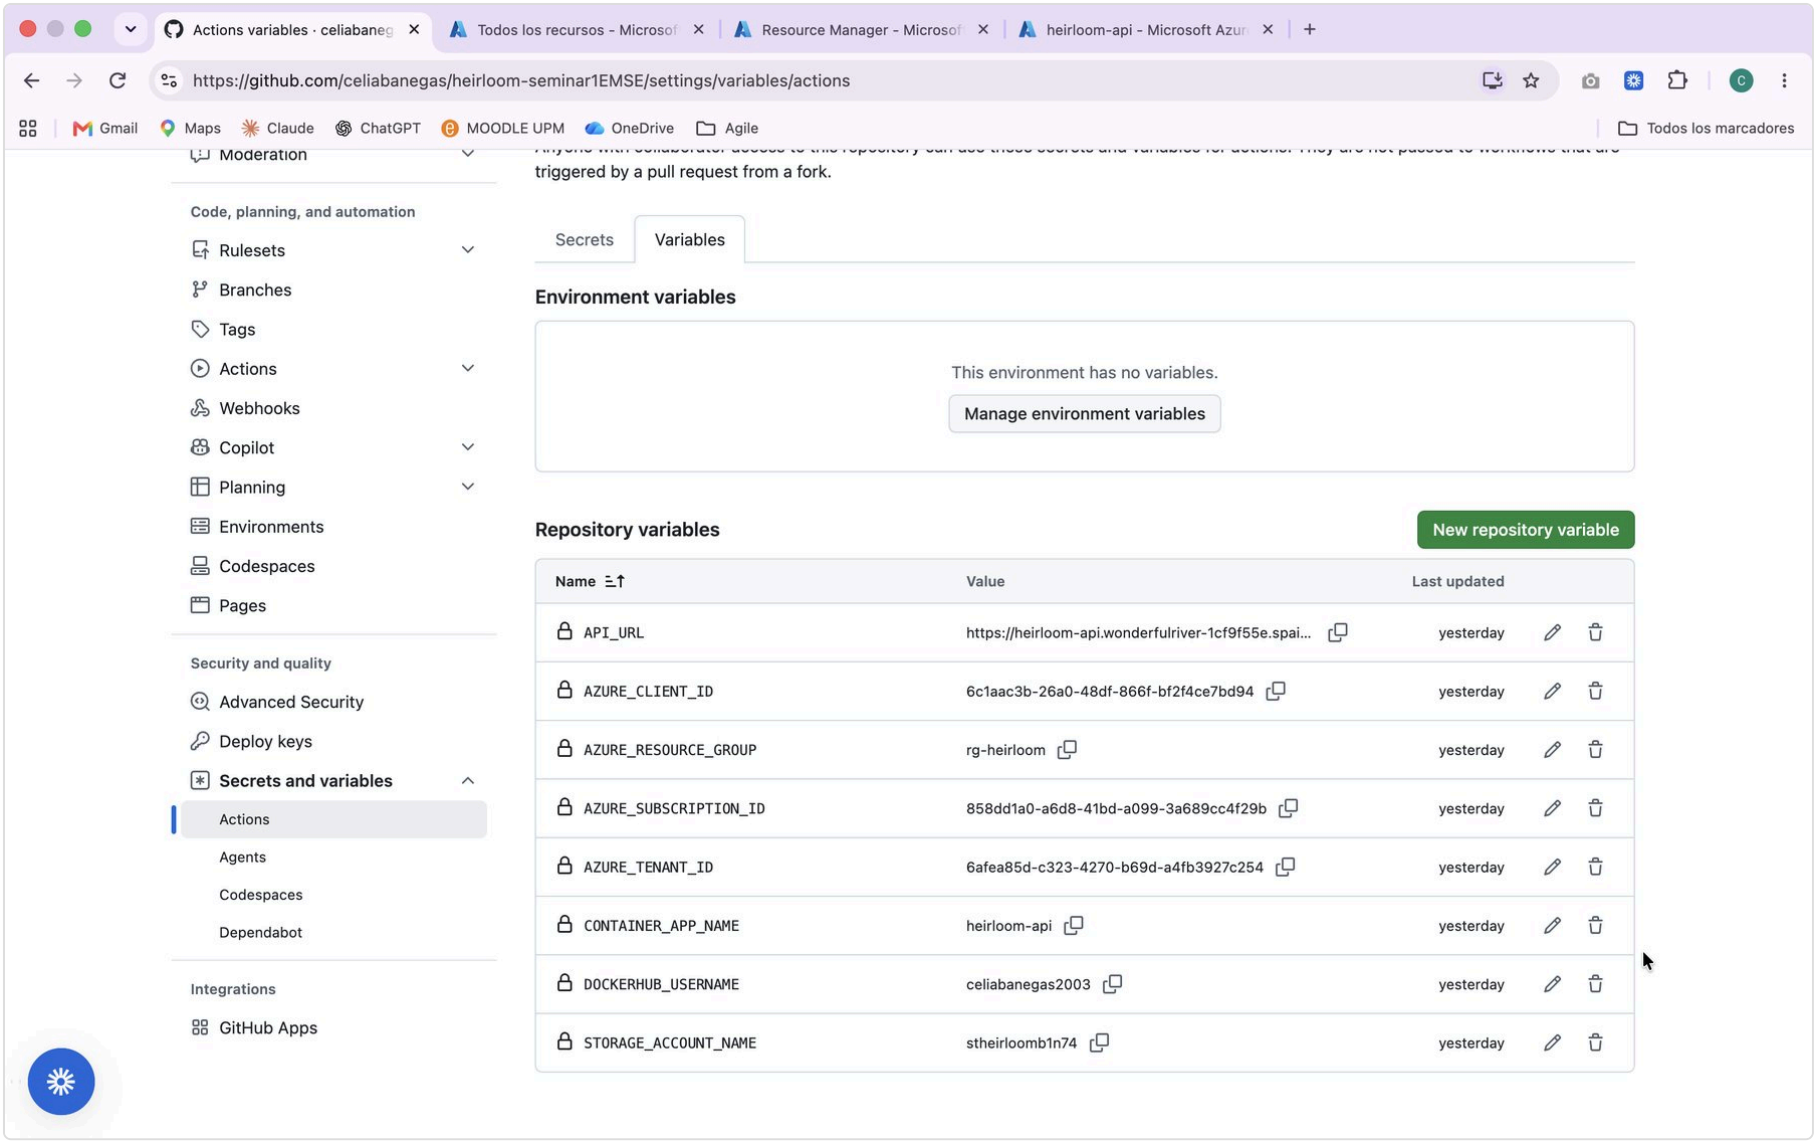

Figure 9. Configuration used by the CI/CD workflows.
